Earning from Affiliate Marketing

Affiliate marketing is an advertising model in which a company compensates a third party to generate traffic, leads or sales to the company product. It is one of the easiest ways of marketing as you do not need to create, design, present and sell a product. Imagine you introduce your friend to a cool gadget, and if your friend decides to buy it, you get a little thank-you gift.

Similarly, in affiliate marketing, you help connect people to products or services, and when they buy through your special link, you earn a commission. The great thing is, you don't have to create or sell anything yourself – just share the link! Big companies often have affiliate programs for things like makeup, shoes, or even domain services. You sign up, get a unique link, and when people click

or buy through it, you make money. It's a way for everyone to win – the buyer gets what they want, the seller makes a sale, and you get a little reward for making the connection.

How do Affiliate Marketers get paid

Big companies use different ways to pay affiliate marketers:

1. Pay per Click/Visit:

- When you help send people to a website and they click on the link, you get paid. The more visitors you bring, the more you earn. It's like getting a reward for bringing friends to a party.

2. Pay per Install:

- If you guide someone to download and install an app or software, you earn money. For example, if you get 410 for each installation and 1000 people install it, you make \$10,000.

3. Pay per Sale:

- This is the most common way. When people buy something through your link, you get a share of the sale. It's like being a helpful guide – if someone buys a product because of your link, you get a reward for helping make the sale.

In simple terms, you earn by bringing people to websites, helping them install apps, or guiding them to make purchases. Each way has its own reward, making it a cool way to make money online.

Best Affiliate Programs

1. Amazon:

- Amazon is a big affiliate program where you can recommend products to people. You sign up on their website, suggest products to your friends or audience, and when they buy something, you earn a bit of money. It depends on the type of product they purchase.

2. Click-Bank:

- Click-Bank is a place where product owners meet people who want to do affiliate marketing. Some product owners might not pay a lot until you show you're good at this. It's like a meeting place for sellers and marketers.

3. Shopify:

- Shopify is great if you run online courses or webinars. You get paid when people you send to the app buy something. You just need to guide your audience and share a special link.

If you're new to affiliate marketing, take some time to learn the basics. It might take a while, but if you want to speed up, learn from someone who's already good at it. You can find mentors or join online courses like Affiliate Junction for faster learning.

Attract your audience to the product and generate a link in the description box. Even one can advertise the product and generate a link at top of the video and suggest his/her audience to purchase the product for several benefits you experience.

If any of the viewers visit a link to buy the item through your provided link, a fraction of the money would be able to earn. In the whole process first, make sure to build trust with your viewers.
